**WE GROW AZALEAS, CAMELLIAS, MAGNOLIAS, ILEX AND
MANY OTHER ITEMS IN QUANTITY
LINING OUT STOCK IS OUR SPECIALTY**

MANY ITEMS GROWN IN CONTAINERS FOR SHIPMENT ANY TIME

Our Business Terms

PRICES. All our prices are net and due by the 10th of the month following purchase. Packing charges are to be added and are based on actual cost. If cash accompanies order, we will allow a 3% discount and we will absorb the packing cost ourselves.

CHARGE ACCOUNTS. From unknown persons who have not established credit with us, we ask for well-known trade reference and time for investigating.

C.O.D. SHIPMENTS. Must be accompanied by 25% deposit and will be considered as cash shipments. If you want us to hold certain items for you, we require a deposit of 25%.

SHIPMENTS. Please specify by what method you want your order shipped. We will endeavor at all times to send out all orders as near the date specified as possible and will do everything in our power to insure satisfactory delivery to our customers, but our responsibility ceases upon delivery to carrier in good condition, insofar as damages in transit are concerned. However, we are here to please our customers and will at all times do all we possibly can to help, should you have to file claim for any damages.

If you have any reason to complain, or if there is any mistake in the order, please let us know at once so that we can rectify the mistake.

It is to be thoroughly understood that we accept any and all orders with the provision that they shall be void, should any injury befall our stock over which we have no control. All orders are subject to any new Government regulations.

REFERENCE. As to our standing and responsibility, we refer you to any bank or business house in Mobile, as well as the better known nurserymen and florists in this country.

THE BLACKWELL NURSERIES, INC., warrants to the extent of the purchase price that nursery stock sold is true-to-name and as described within recognized tolerances. Seller gives no other or further warranty, express or implied, and will under no circumstances be liable for more than the invoice value at the time of purchase.

SHIPPING POINT
SEMMES, ALA.

Telegraph and Telephone
Mobile, Ala., GArden 6-9937

Member of American Association of Nurserymen and Other State and Local Organizations to Promote the Cause of the Industry

Our nurseries are located at Semmes on highway 42, fifteen miles northwest of Mobile. We have over 14,000 square feet of greenhouse space for propagation only. We have more than 60,000 square feet of hotbed space for growing plants in. We use most of these for Azalea liners, all equipped with an automatically controlled heating system. We have more than twenty acres of lath house space, all under overhead irrigation where we grow Azaleas, Camellias, Ilex, Magnolias, and many other items.

One section of our propagating houses.

AZALEAS .

THIS year we have a wonderful lot of Azaleas to offer. We have increased the area of our sprinkler system and with the addition of this water we are growing some beautiful plants. They have a wonderful root system and the foliage is excellent.

Azaleas can be moved almost anytime during the year, but for best satisfaction it is much better to get your plants before they start blooming. You will get the benefit of the blooms the first year and they will make a better display for your clients.

For nurserymen and growers we are offering this year a million and a half Azalea liners. We keep them growing all winter in our heated frames in specially prepared soil. They are well rooted and branched for spring delivery. We usually start shipping these liners about the last week in March, but for greenhouse operators where space is available it is better to get them in early February. Because of the quality of our plants and the very low price at which we are offering them, we are usually booked up early in the season. We urge you to order early.

Hot beds where we grow Azalea liners. These beds are equipped with a hot water heating system for protection.

AZALEAS Continued .

KURUME AND PERICAT AZALEAS

These are most popular as they are used extensively as pot plants and also in landscaping for borders as well as mass planting in beds. As a pot plant there is nothing we know of that is superior. We urge you to try a few if you are not already using them.

China Seas. Fast grower, nice pink hose-in-hose. Excellent for late forcing.

Christmas Cheer. Hose-in-hose; small deepest red. Small foliage; compact growth.

Coral Bells. Hose-in-hose; small, bell-shaped flowers of a beautiful shade of pink. Small glossy foliage; very compact growth. The favorite of florists for pot culture.

Glory. Fast growing nice salmon pink hardy variety. Flowers almost same color as Salmon Beauty, but not quite as large. Very profuse bloomer.

Hexe. Hose-in-hose; large, deep red. Excellent dwarf compact growth. Very much in demand.

Hexe de Saffalare. Hose-in-hose similar to above except larger. New and very popular.

Hinodegiri. This is a very popular bright red variety. The blossoms cover the plant in such a manner that you can hardly see a leaf when in full bloom. Compact, slow growth. Very hardy.

Marjorie Ann. Fast growing Pericat similar to Sweetheart Supreme, except flower bright salmon. Very good for forcing.

Pink Pericat. Beautiful rose-pink sport of Mme. Pericat.

Red Wing. Pat. No. 1159. Beautiful large red Azalea which is an excellent pot plant variety similar to Hexe, except a much larger flower. Not quite as hardy out doors as Hexe de Saffalare.

Salmon Beauty. Hose-in-hose; large, salmon color. Compact growth. Very showy plant and an excellent variety for pot culture.

Snow. Hose-in-hose; pure white flowers cover the plant. Fairly large, dark green leaves. Very popular with the florist.

Sweetheart Supreme. Salmon-pink. Keeps well. Very fine.

Coral Bell and Hexe, 5 to 6 inch spread
with six inch Azalea pot.

Camellia Japonica

Despite the fact we have had a shortage of blooms the past few years, Camellias are still very popular and are being planted in great numbers. We are finding they are hardier than most people think and at today's prices they are in reach of all home owners.

There is and always will be quite a lot of argument in regard to Camellia names. We are listing each variety by the accepted name used by the majority of growers. No doubt some of these will be changed in the years to come as some are being changed now, and when this happens we will always list each variety by as many names as we know it to be sold under. This will prevent you from duplicating varieties.

We are trying to grow all of the better varieties, and not trying to introduce a lot of new seedlings that are good only for understock. We hope to increase our list of varieties as long as we can find new ones to buy that we believe are worth growing. We use several thousand plants each year for understock and we also use many **Camellia Sasanqua** for understock and find it sometimes works better than **Camellia Japonica**.

We are listing our Camellias in groups for convenience in pricing. The scarcity, demand, and quality of the blooms determine the group they are listed in.

Standard Camellias

GROUP I

Alba Plena. One of the oldest and best-known Camellias. A pure white, full, double sort that is preferred for corsage use. Very susceptible to cold damage.

Big Beauty. Large, white, blotched and dashed with pink. Good grower. Large, light green foliage.

Black Dragon. Flowers are very large and very dark red and resemble in color Mrs. Charles Cobb and in form Victor Emmanuel.

Cardinal Richelieu. This fine peony-form red Camellia has proven extremely hardy. Free flowering. Starts flowering in November through March. Foliage large dull green. Growth strong symmetrical.

Colonel Firey. Very double, well-shaped flower, 5 to 6 inches across, of brilliant crimson. One of the best red Camellias. Said to be true C. M. Hovey.

Debutante. Large, peony-form, light pink, blooms early. Fast grower with large, serrated leaves of dull green. Very desirable.

Elegans (Candler). Rich cherry-red with white variegation. Large flower, 5 to 6 inches in diameter, some of loose peony-form and others with thick peony flowers, all on the same plant. Leaves are rich shiny green.

Empress. An immense, semi-double deep pink flower with golden stamens in the center.

Haku Rakutan. An extraordinary 5-inch white blossom, loosely formed, with a few stamens intermingled with the petals. Light green, glossy foliage. Tall, vigorous grower.

La Reine. This outstanding large, handsome Camellia is no doubt a variegated sport of Lady Mary Cromartie. Having all the habits of the latter. Foliage large, rounded, waxy. Growth slow, sturdy, upright.

Margaret Higdon. Large, semi-double, pink bloom, fading to almost white around edges of petals, with stamens intermixed. Large foliage, somewhat serrated.

Mary Charlotte. A medium to large flower, light pink in color with a full anemone form.

Mathotiana Rubra. Very large, deep red flowers turning purple as they age, and showing stamens when fully open. Fast grower with large, dark green foliage.

Mathotiana Variant. Very large flowering type, similar to Mathotiana Rubra except for white throughout the flower. One of the very best in flowering as well as growth. Large, dark green foliage with some variegation.

Mrs. Charles Cobb. One of the darkest red Camellias we know, almost black. Rich golden stamens intermixed in petals. Very fast grower with rounded light green foliage. We highly recommend this variety.

Princess Murat. Very much like Elegans, especially in habit of growth. Flower solid beautiful shade of pink. Very desirable.

Princess Nagaski. A very large, semi-double, soft pink flower marbled with white and measuring 5 to 6 inches across. Very long, deeply serrated, dull green foliage. Low, vigorous, spreading growth mid-season to late flowering.

Rev. John Drayton. A loose peony-like flower of pleasing deep pink; wavy petals intermingled with golden stamens. Light green foliage. Tall, angular growth; late bloomer.

Rev. John Bennett. True stock from original plant in Magnolia Gardens. Large, semi-double, salmon-pink. Fast, willowy grower. An excellent variety.

Victor Emmanuel. Unusually large, peony-form, very deep red. Excellent grower and late bloomer. Very desirable.

Victory White. Flower is semi-double, of the peony type, measuring 4-5 inches in diameter. Pure white in color. Numerous small petals intermixed with yellow stamens at the center. A very heavy bloomer at mid-season.

	100
6 to 8 inches	\$25.00
8 to 12 inches	35.00

Standard Camellias

GROUP II

Brilliant. An unusual brilliant red shade is this full double flower. Very dark, glossy foliage. Bushy grower; mid-season bloomer.

Eleanor Haygood. Its rose form flowers upon developing fully show a few short stamens when completely open.

Elizabeth Arden. This variegated Camellia opens rose form. Semi-double in construction, often sporting solid rose red flowers. Late flowering and very hardy. Foliage long, narrow, medium green.

Fanny Bolis. Very large, semi-double dark red variety variegated with white, having golden stamens in the center of each flower. flower.

Jarvis Red. Large, semi-double, deep red flower with the stamens showing very prominently. Dark green foliage.

Leucantha. This is a pure white Sport of the Tricolor Seboldi. Hardy flowering early to mid-season. Foliage dull green slightly ruffled. Growth sturdy, upright.

Monarch. Very large, deep pink with white variegation. The stamens are so intermixed that often one single flower will resemble a bouquet. Very compact; dark green foliage.

Pink Perfection. Usually considered the most popular pink variety for cutting. It is a full double flower of medium size and shell-pink in coloring. Slow growth; early free bloomer.

Pope Pius IX (Prince Eugene Napoleon). Large, double red flowers. Good growth; Light colored foliage. Very popular.

Prof. C. S. Sargent. A large, red, peony type flower of bomb-like form.

Sen. Duncan Fletcher. This fine peony-formed rose red to dark red Camellia flowers mid-season to late. In cold weather the color is deep velvety red. In mild weather it is rose red. Free flowering. Foliage dull green twisted. Growth upright.

Pres. Lincoln	C. M. Wilson
Magnoliaeflora	Mrs. Baldwin Wood
Marjorie Magnificent	Woodville Red
Mathotiana Supreme	Joshua Youtz

Camellia Sasanqua

THESE handsome flowering evergreens offer a wonderful opportunity to nurserymen all over the South. They grow and do well in sections where **Camellia Japonica** is a failure, and can be used for screens and hedging, trimmed or otherwise, while the individual plants make fine specimens.

We have heard reports from certain sections of the country where **Camellia Japonica** does not do so well, that grafting on **Camellia Sasanqua** enabled these nurserymen to grow many varieties of Japonica. This was not where the temperature prevented the growing of Japonica, however. We do know that most Sasanqua will stand more abuse than any Japonica. We have seen them grow in wet ground where japonica would not grow. We are using more and more **Camellia Sasanqua** for understock each year. The demand for it as understock has increased considerably in the last few years, almost depleting the supply of sizes suitable for landscape use. We advise you to cover your needs on this item as early as possible.

Camellia Sasanqua, Daydream. Flowers are extremely large, white at the base, shading to deep pink at the outer edge, with a beautiful cluster of golden yellow stamens in center. Excellent for hedges or screen work.

Camellia Sasanqua, Maiden Blush. Fast grower. Medium size, single of delicate pink.

Camellia Sasanqua, Mine-o-yuki (Snow on the Mountain). Large, semi-double, beautiful white flower.

Camellia Sasanqua, Rosea. Single, large, rose-pink flower. Very fast grower.

Camellia Sasanqua, Texas Star. A new variety introduced by Mr. Price Magee, a Louisiana nurseryman. Very symmetrical growth and very dense. Medium size light pink flower.

CAMELLIA SASANQUA
1 Gallon Container

CAMELLIA SASANQUA
8 to 12 in. liner

Oriental Magnolias

Our stock of these fine Magnolias is much larger than ever before, and they are about the nicest we have ever seen anywhere. Our liners are especially nice and we recommend them very highly. Most of these Magnolias are hardy in nearly all parts of the United States, and make beautiful trees for Spring flowering.

All liners are shipped bare root and we recommend shipping the larger sizes in this manner when the distance is very great. They can be moved safely in this manner, and can be shipped where B&B would be almost prohibitive.

All our Oriental Magnolias should be shipped out before February first. They come into flower and growth buds soon after and would be harder to transplant. If you have some place like a bulb cellar where you can keep them above freezing, yet cold enough so they won't start new growth, you can hold them fine. 33 to 45 degrees is about perfect.

Magnolia Rustica Rubra. Large flowers of dark reddish purple. Very fast grower and excellent variety. Later bloomer than Soulangeana.

Magnolia Soulangeana. Very hardy, fast growing, and one of the most sought-after plants for use all over the United States.

Magnolia Soulangeana Nigra. Dark purple. A late bloomer and not quite so hardy as Soulangeana.

We have a very complete line of container grown stock to offer for Summer and Fall shipments. They can be moved early and will give you a much longer selling season. Our stock has been sheared many times and kept well fed and watered. We invite you to inspect our stock and compare with others. We know we can please you.

We have worked out a wonderful soil mixture which is very light. Transportation cost is not nearly so much on our stock. Our prices are very reasonable especially when you consider the quality of our stock.

Please Note: All stock illustrated in same size container as offered.
